

# How to identify ticks and fleas

**petsecure**<sup>™</sup>  
CANADA'S PET INSURANCE

For most pets, the outdoors is a great place to be – especially if it's warm outside all year long!

**Did you know that ticks and fleas can survive to temperatures as low as -4°C?**

Ticks might be hard to detect if you aren't sure what you're looking for. Check your pets regularly throughout the year to eliminate any concern for tickborne illnesses and speak with your veterinarian about products that can keep your pet tick and flea free all season long.

## Here are the most common places you should check your pets for ticks and fleas

- 1 In and around the ears
- 2 Around the eyes
- 3 Under their collar
- 4 Inside the legs
- 5 Around the tail
- 6 Between the toes

Unsure what to do if you find a tick on your cat or dog?  
**Contact your veterinarian** about safe removal.

## Here are the most common types of ticks you might find on your pet after an outing

**DEER  
TICK**

**AMERICAN  
DOG TICK**

**BROWN  
DOG TICK**

**LONE  
STAR TICK**

**ROCKY  
MOUNTAIN  
WOOD TICK**
