

No-Sew Cat Beds

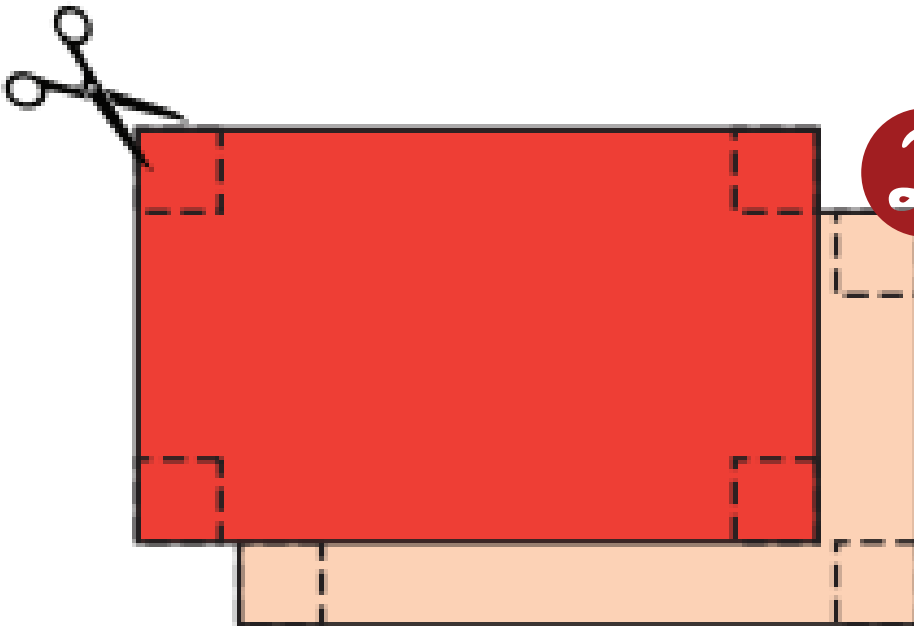

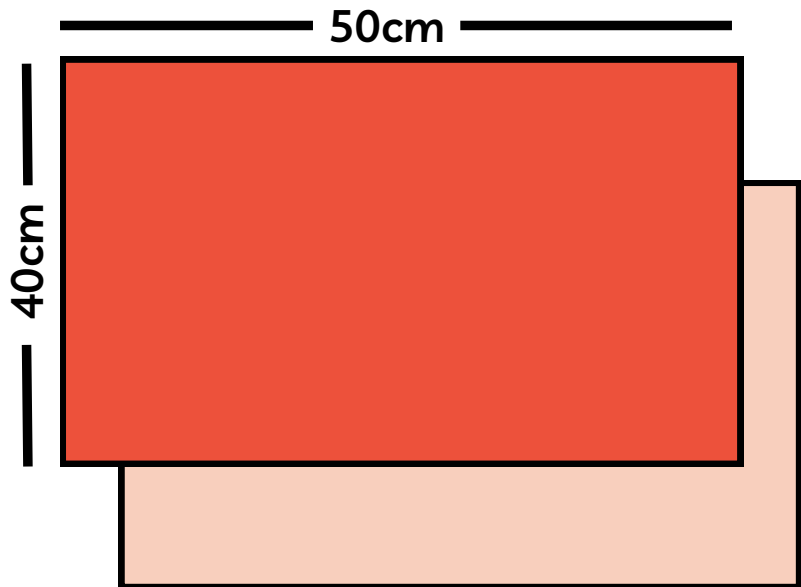

Have extra fleece fabric around the house that you don't need? Upcycle your extra fleece into a custom, one-of-a-kind cat bed. No sewing required!

Materials: 2 squares of fleece fabric, sharp scissors, ruler, marker, old t-shirt to stuff

Directions:

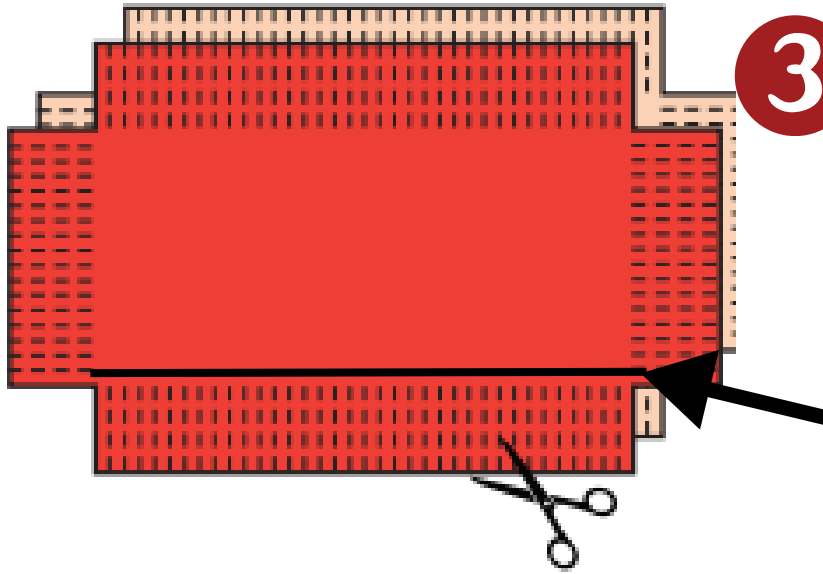

1

With a ruler, measure two 50 cm by 40 cm rectangle pieces of fleece fabric. Cut out.

2

Measure and trace a 7 cm by 7 cm square from each corner of both pieces. Cut out. Place one piece on top of the other to make sure they are roughly the same size. Trim if needed.

3 Every 2 cm (a bit thicker than your finger) make a mark then carefully cut fringes all the way around the side of both pieces. Each fringe should be about 5-8 cm long. The longer the fringe, the easier it is to tie together.

Tip: Draw a line 5-8 cms up from the fleece edge on each side, so you'll know how long to cut the fringe.

4 Make sure your pieces are placed one on top of the other and the fringes roughly line up. Take a fringe from the top piece and a fringe from the bottom and tie them together in a knot. Continue to tie knots on three sides of the bed. Leave one side open.

Tip: If you've marked a line on your fleece for how long to cut the fringe, make sure that side is facing the other fleece piece.

5 Fold an old, clean t-shirt to fit inside as the padding for the bed. Tie knots in the fringes along the remaining side to close it up!
