

# No-Sew Cat Beds

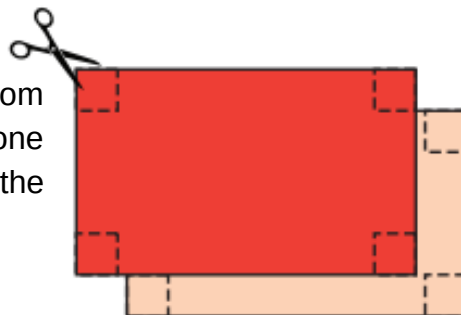

Have extra fleece fabric around the house that you don't need?  
Upcycle it into custom, one-of-a-kind cat bed. No sewing required!

**Materials:** Fleece fabric, sharp scissors, ruler, marker, old t-shirt or fabric to stuff

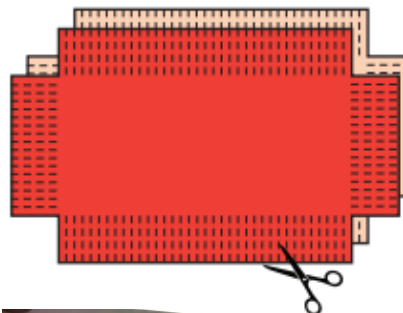

## Directions:

**1** With a ruler, measure two 50 cm by 40 cm pieces of fleece fabric. Cut out.

**2** Measure and trace a 7 cm by 7 cm square from each corner of both pieces. Cut out. Place one piece on top of the other to make sure they are the same size. Trim if needed.

**3** Every 1 to 1.5 cm make a mark then cut fringes all the way around both pieces. Each fringe should be about 8 cm long.

**4** Take a fringe from the top and a fringe from the bottom and tie a knot. Continue to tie knots on three sides of the bed. Leave one side open.

**5** Fold an old, clean t-shirt to fit inside as the padding for the bed. Tie knots in the fringes along the remaining side to close it up!

Don't have a cat? That's okay! You can make this bigger or smaller for other kinds of pets (or yourself), or even donate it to a local BC SPCA shelter!
