

Guinea Pig and Rabbit Sushi

This creation challenges young chefs to turn healthy veggies and fruit into a very special "sushi roll" treat for bunnies and guinea pigs, adding some yummy variety to their diet. Take care or get an adult's help with sharp knives for the chopping and slicing.

Materials:

- cutting board
- a knife for cutting
- zucchini
- a variety of vegetables and/or fruit suitable for rabbits and guinea pigs (leafy greens like romaine lettuce, arugula, kale, parsley, cilantro, de-seeded bell pepper or apple, mint, banana, strawberry, etc.)

Directions:

Wash your fruits and vegetables.

Hollow out the zucchini and set the rest aside for future use. Take care with sharp knives.

Cut the remaining fruits and vegetables into long, thin strips.

Stuff the hollowed-out zucchini with the cut strips. They should be tightly packed!

Cut your "sushi roll" into pieces about half an inch thick.

Serve and watch your pet enjoy! Refrigerate leftovers.

Tip:
Fruits such as strawberry and banana are high in sugar and should be given in moderation, just like all treats!
